

Are your automated tests covering only module level functions? –no time or budget for user interface level integration test scripts?

How do you ensure the proper working of third party applications to integrate with?

XTest

XTest is a powerful automated test tool for XML or HTML based applications, using XPath assertions

XTest features

- Powerful XPath assertions
- Standalone Windows application, with simple HTML report output
- Tidy up dirty HTML to allow XPath

BeyondTrees XTest Report (version 1) 02-Sep-09 @ 11:56:59
activation key for Evaluation Purposes until 2009-12-31

	0 errors 12 successful assertions 1 failures 13 assertions (92% success ratio)
